

Symbols and Understanding

By Sr. P.U.A.L. 3°=8□

Symbols are of great importance and are used frequently as a means to deepen our understanding of existence. In themselves, symbols are no more true than using a word for something in any language, but it is the concept behind the symbol that needs expression. Whether the concept is expressed as a diagram, a zen koan or a lengthy myth is irrelevant, but whatever the means or the language is, we need to be able to work with it.

Personally, I have experienced how a symbol seems to change itself with time, but realized that it is really my understanding of the concept behind the symbol that has changed. No symbols, words or images will provide us with truth, but we can let them affect our understanding so that insight can grow silently as we meditate upon them.
